AGENDA

1. **Preparing for your Update**
2. **June Release Update**
3. **Design System Releases**
4. **September & December Releases**
5. **Google Analytics 4**
6. **Security**
7. **Questions**

Preparing for Layout Builder

Preparing your site for moving to Layout Builder

Content Audit & Review

- Audit - List current website pages in a spreadsheet by menu section
  - This will give you a visual overview of how your site is structured.
    - *Be sure to audit your Drupal Admin back end for unpublished pages that can be removed/deleted!*
- Review - Visit each page and review content
  - Identify key pages & content types
  - Locate content that is outdated, duplicated, needs further review, consolidation etc.
  - Find content gaps - what might be missing?
  - Identify commonly used page components (i.e. Cards, Carousels, Accordions, Ping Pongs, etc.)

Preparing your site for moving to Layout Builder

Plan your Migration

- Familiarize yourself with [new Layout Builder Components](#)
- Get organized - Write new content, complete audit spreadsheet, identify components you will need
- Identify key pages - start with your home page and important top-level pages
  - Programs, Locations (Branches, Camps, etc.), Memberships, Articles/Blogs, Events, Schedules, etc.
- Create a plan - decide which pages you want to build first
  - Most → Least complex

Let's review a page on ymca.org together!

June Release Update

June 2023 Release Update

- Drupal 10 - on target!

AUDIENCE OVERVIEW ›

Google Analytics 4 - What you need to know

The end of Universal Analytics is coming July 1, 2023.

This is a great time to evaluate how you have used Google Analytics and how you would like to use GA4!

- Set up parallel tracking while you explore GA4
- Review (and archive) Google Universal data that's most important to you
- Configure GA4 to meet your ongoing marketing needs

Read more in our [blog post about the transition](#) and [video about adding GA4 to your site using Google Tag Manager](#).

Google Analytics 4 - Setup with the GA Module

Google Analytics Module

- Best if you don't have Tag Manager set up

- No integration with other tracking

- GA module version 4.0.2 available since WS 9.2.11 (November 2021)

Google Analytics 4 - Setup with the GTM Module

Google Tag Manager Module

- Unified tracking

- One place to add GA code

- No Drupal code changes

- Update tracking in GTM, not in Drupal

Upgrade Path

Regular Drupal Maintenance Updates

What do do if (when) you see this Drupal warning message:

- **Do not:** worry. The YMCA Website Services team is monitoring for *urgent* security issues that apply specifically to the distribution.

- **Do:** Contact your development partner to confirm that they have a plan to apply periodic Drupal Core and Module updates.

❌ There is a security update available for your version of Drupal. To ensure the security of your server, you should update immediately! See the available updates page for more information and to install your missing updates.

There are security updates available for one or more of your modules or themes. To ensure the security of your server, you should update immediately! See the available updates page for more information and to install your missing updates.

⚠ Website contains unresolved configuration conflicts. Please visit Upgrade Tool Dashboard page and follow the instructions.
